VIKINGS MEET CARLETON FIVE TOMORROW NIGHT

WIN NECESSARY
TO KEEP BLUES
IN TITLE RACECarls To Bring Veteran Team
Here; Rummel and Jackola
Back On Squad

Coming here with a team of veterans, Coach Cowles and his Carletonians will attempt to shove a wobbly Viking five into oblivion at Alexander gymnasium tomorrow night.

Led by Captain "Whitey" Nicholson and "Skip" Crawford, giant center, the Carls have trimmed Hamline and Knox in their only two conference games. The Minnesotans won from North Dakota U., but lost skirmishes to the universities of Wisconsin and Chicago.

Carleton Speedy

At present, Carleton and Beloit are tied for second place in the Midwest Loop, but if the Denneymen can turn the trick, Carleton will drop a tie for third place with the Vikes. A defeat would practically eliminate Lawrence hopes of finishing on top.

Last year, the powerful Northfield team ran up eight conference triumphs without a loss to capture Midwest honors. Coach Cowles lost only one man through graduation and will use the same style of fast, shifty, ball playing which so completely smothered last season opponents.

Rummel, Jackola Back

In an overtime tilt, the blue and white lost to the Cowlesmen 27 to 25 last year. It was one of the most strenuous games the Viking players experienced. Lawrence was leading by one point near the end of the fray but a free throw tied the score, and in the extra session, a basket by Grove gave the Carletonians the edge.

Rummel ironed out his differences with college officials and with Jackola, will again be in uniform. Denney will pick his lineup from Biggers, Rasmussen, Rummel, Vanderblumen, Jackola, forwards; Laird, Schneller, centers; Slavik, Pierce, Cinkosky, and Fischl, guards.

Tickets Now On Sale

For Y.W.C.A. Benefit

According to an announcement by Louise Edwards, '31, tickets are now on sale for the Y.W.C.A. benefit movie, "Glorifying the American Girl", a Ziegfeld follies revue, which will be shown at the Fox theater next Thursday and Friday. Tickets, which sell at fifty cents may be obtained from members of Y.W.C.A., and individual sorority and fraternity members.

Profits from the enterprise will be used to send a group of Lawrence women to the annual Geneva Conference. Last year Lawrence had ten representatives at the conference, including Lois Kloehn, Cecelia Baldwin, Dorothy Gough, Helen Rudin, Betty Wiley, Margaret Holly, Christine Nibbe, Jean Cannon, Agnes Snell and Cecelia Werner.

Wax Portraits Are

Displayed At Library

A collection of wax portraits by Ethel Francis Mundy, unequalled nowhere, except perhaps in the Metropolitan Museum in New York, have been on display at the college library during the last week. The exhibition will be held here until Monday.

A number of linoleum prints, the work of two young Philadelphia artists, are being featured in the library this month. The artists are Charles Eugene Klebe, and James Kirk Merri-
ck.

New Institute Of Paper Chemistry Is Opened For First Term

O. E. Brown Takes
Place On Faculty

Orley E. Brown, who will fill the temporary vacancy occasioned by Dr. J. C. Lymer, who is away on a semester leave of absence, began his connection with Lawrence college February 3 as associate professor of mathematics.

Mr. Brown received his Ph.D. degree from the University of Chicago last August. He was graduated from the University of Iowa in 1921 with a Bachelor of Arts degree, and in 1922 was awarded an M.S. degree from the same institution. During his undergraduate days at the University of Iowa, Mr. Brown served as a part time instructor in mathematics. From 1923 to 1928 he was instructor in mathematics at Northwestern University. He has also gained experience in statistical work in the business field having been connected with the research department of a large radio corporation for a short time.

Paper Institute
Gets \$2,000 GiftBeloit Iron Works Donates To
Fund; School Has \$60,000
Operating Budget

A gift of \$2000 for the Institute of Paper Chemistry was received from the Beloit Iron Works of Beloit, Wisconsin, according to announcement made by Henry M. Wriston, president of Lawrence College and director of the Institute. The gift is another indication of the interest with which the opening of the Institute is being watched by paper manufacturers and allied industries throughout the state.

Support for the Institute has already assured an annual operating budget of \$60,000 equivalent to an additional endowment of \$1,000,000.

A gift of \$15,500 from anonymous donors, friends of the project was received early in the fall and is being used for the Institute library. More will be added to it later. Two other gifts were in the form of two annual fellowships of \$1500 each, available to exceptional students.

A recent gift of library materials valued at \$3000 was made by the committee on Abstracts and Bibliographies, affiliated with the National Research Council.

Artist Series Tickets

To Be Given Out Today

Artist series tickets may be obtained at the office of the student secretary, second floor of library, today from 1:30 to 5:00 o'clock. All college tickets must be presented and students will receive the same reservations as those held last semester.

The next concert is Tuesday, February 18, Dusolina Giannini, soprano.

The BILLBOARD

Friday, Feb. 7—Faculty meeting.
Saturday, Feb. 8—Beta Phi Alpha informal.

Basketball, Carleton here.
Sunday, Feb. 9—Newman club meeting.

Wednesday, Feb. 12—Basketball, Ripon here.

Saturday, Feb. 15—Kappa Delta formal.

Basketball, Knox here.

Tuesday, Feb. 18—Artist series, Dusolina Giannini.

DEBATE TEAM
TO OPEN HOME
SEASON MONDAY

Meet Marquette Squad; All Lawrence Debaters Swing Into Action

The Lawrence debate season will be opened at home Monday evening when William Morton and Dan Hopkinson, both '31, meet an affirmative team from Marquette university on the subject: "Resolved: that the United States should adopt a policy of national disarmament." One of the members of the Marquette team is Jack White, formerly a member of the Lawrence squad, who transferred to Marquette last year.

Forensic activities came into full swing during the exam period and between semesters, with debates with both Beloit and Ripon. A Lawrence affirmative team composed of Robert Beggs, '31, and Ervin Marquardt, '30, met Ripon at Neenah high school last Monday morning, and again at Menasha in the afternoon.

A Lawrence negative team, composed of Marshall Wiley, and Henry Connor, both '33, met a Ripon affirmative team in a series of debates in Chippewa Falls, Owen and Colfax, on Tuesday, Wednesday and Thursday.

Last night a Lawrence negative team met Coe College in the Green Bay Y.M.C.A. before the members of the public speaking club of that city. It was not known who would represent Lawrence against Coe last night.

The personnel of the Lawrence team which will travel to Milwaukee to meet Marquette and Ripon teams this week, has not been chosen.

Comedy Selected
For Sunset Play

"The Queen's Husband" To Be Presented Mar. 14; Tryouts Being Held

"The Queen's Husband," a three act comedy by Robert Emmet Sherwood, has been selected by Sunset Players for its second major production this year. The play will be presented March 24, under the direction of F. Theodore Cloak, dramatic director of Lawrence College.

Tryouts for the cast of 11 men and four women have been held this week and will be continued Monday afternoon, at four o'clock.

The play has been unusually popular among college dramatic circles and with Little Theatre groups. Wherever it has been presented it has met with favorable comment for its cleverness and satiric wit.

Five New Books Added
To English Library

Five new books have recently been added to the English club circulating library. They are: "Hudson River Bracketed," by Edith Wharton, "The Hidden City," by Sir Philip Gibbs, "Best British Short Stories of 1929," edited by E. J. O'Brien, "Passion Flower," by Kathleen Norris, and "The Young Idea," by Frank Swinerton.

Lutheran Club

The Lawrence Lutheran club will meet next Sunday evening at the Mt. Olive Lutheran church at 5 o'clock. A discussion program is being planned.

Goodwill Student Catches
Glimpse of Royal Family

Dear Friends:

One evening just before leaving England, as I was returning from visiting with Professor and Mrs. Daniel, I noticed huge crowds of people in front of the theatres. Possessing a natural curiosity, I stepped out of the bus and helped others impede traffic for blocks around. I can still hear a giant policeman's "Back to the curb, please," as he dutifully attempted to push me backwards. How was he to know that in my efforts to see over the heads of others I was being held as in a vise, with my feet suspended above the ground, and that it was not left to me which way I was to move. I began to feel myself getting thinner when someone shouted, "Here they come!" And thanks to my position I was able to see the King and Queen followed by the Duke and Duchess of York as they left the theatre. Immediately everyone cheered, hats were waved about in the air, and a demonstration took place in which everyone joined—ample proof of the popularity of the Royal family. It wasn't just curiosity that attracted the people, as in my case, because they had seen the King and Queen many times before, and had always given them the same spontaneous reception. There was something fine, I thought, in the dignified manner in which their Majesties acknowledged the cheers and greetings. As I think of it now it seems curious how I half expected them to appear in crowns, and jew-

Koch

els, and flowing robes, but to my disappointment they looked almost ordinary in their theater clothes. (To the question of girls, which is sure to follow any mention of the Royal family, I am sorry I must say that I did not see him.)

Following a comparatively smooth channel crossing and a long, tedious train journey, I arrived in Berlin twenty-seven hours after I left London. Contrasted with the mild English weather I had just left it might as well have been the North Pole. As I shiveringly walked out of the station I was surprised at the commotion that greeted me. The streets were noisy with many swiftly-moving taxis; men and women shouting "Berliner Tageblatt" or "Acht Uhr Abendblatt," and crowds of people everywhere walking as if they had some place to go. It is the most active city I have seen, including London. It reminds one of an American city with its hustle and bustle, its magnificently lighted streets and buildings.

I have done very much walking about these first few days getting acquainted with names and buildings, and one day I came upon a very familiar street. For some reason or other the authorities have seen fit to give my name to one of their thoroughfares, but it seemed to me at the time that they could have chosen a better location. Particularly interesting was it to walk down Unter den Linden at night which in places is brilliantly lighted, especially in front of great international commercial houses. At one end is the Sieges (Continued on Page 4)

To Speak Here

Capt. Dennis Rooke

Noted Aviator To
Speak at Vespers

Captain Dennis Rooke, England To India Flyer, Will Appear Here Sunday

Captain Dennis Rooke, late Lieutenant of the Royal Air Forces, and England to India Solo Flyer, will lead the Vesper services at the Methodist church at 4 o'clock, Sunday afternoon.

Captain Rooke, amazing soldier of fortune, made one of the most spectacular flights in the history of aviation on his famous solo flight from London to India by light plane. Flying a tiny, single-engine Moth plane, the daring captain, unaccompanied, accomplished the 7000 mile flight through a series of breath taking adventures.

In his illustrated lecture he recounts the story of his historic flight with marvelous vitality. He is a vivid and humorous speaker. Personal meetings with Colonel Lindbergh in Paris, with Kaiser Wilhelm at Godesburg, with the Prince of Wales in London—are interestingly described by the captain.

Dr. Lymer Ill At Omaha
Hospital; Report Favorable

Dr. J. C. Lymer, professor of mathematics, has been seriously ill at the Bryan Memorial hospital, Lincoln, Nebraska, during the last several weeks. Dr. Lymer's condition will not permit him to return to Lawrence this semester, although reports received recently indicate that he is recovering slightly.

Dr. Mursell To Speak
At Music Convention

Dr. James Mursell, professor of education, will deliver an address to the Music Supervisors' National Convention to be held in Chicago in March. He will speak on the "Principles of Teaching Music in Junior High Schools."

At the Music Teachers' National Convention held in Cincinnati, in December, Dr. Mursell spoke on the "Ideal Music Lesson." Dr. Mursell also gave a talk to the Green Bay Catholic Woman's Club, Tuesday, January 28, on "Music Appreciation."

Willard Schmeling, Fond du Lac, visited at the Phi Kappa Tau fraternity house, Tuesday.

SEVEN ENROLL
FOR TECHNICAL
COURSE WORK

Nine Courses Will Be Offered; Librarian Brought Here From Norway

The Institute of Paper Chemistry of Lawrence College opened this week for its first term as the first graduate work offered at Lawrence. The laboratories of the Institute are quartered in the new Alexander gymnasium. The enrollment includes seven select students. Exacting requirements and limited capacity necessitated refusals to a considerable number of applicants.

Gives M. S. Degree

Under the supervision of Dr. Otto Kress, technical director of the Institute, a full course of study leading to a master of science degree is being given. The entire course of instruction is designed to meet the purposes for which the Institute was organized and financed by the paper industries of Wisconsin.

Miss Hjordes Roseth, Institute librarian and expert bibliophile, has been brought from Norway to teach a course in "Abstracts and Bibliographies" which is heralded by paper manufacturers as one of the most unique and valuable courses given anywhere particularly since so little attention has been paid to it in the past. The course is designed to give technically trained men a knowledge of the vast amount of material available for research in the field of pulp and paper chemistry.

Will Compile Library

Prior to coming to Lawrence Miss Roseth was engaged in research chemistry at Hawkesburg, Ontario, Canada. Her experience in connection with Norwegian and Canadian paper industries in the field of chemical research qualifies her to make an important contribution to the course of study inaugurated with the Institute of Paper Chemistry. To Miss Roseth will fall the task of compiling the Institute library materials.

It is hoped by Institute authorities that the library will eventually become the best equipped and possessed of the most valuable collections of research material in the country. A fund of \$15,000 has already been established by friends of the Lawrence Institute to finance this library project, one of the original purposes for which the Institute was founded.

Youtz to Teach

Inorganic Technical Analyses is the title of a course taught by Dr. L. A. Youtz, professor of Chemistry at Lawrence college. Dr. Youtz has long had contacts with the chemistry of paper making and is often called upon to serve as consulting engineer for paper mills in the Fox River Valley. This course deals with the methods of analysis and interpretation of the data obtained by the examination of important raw and intermediate materials used in the pulp and paper industry. This covers the analysis and interpretation of the results obtained of such materials as: coal and fuel oils, water for boiler and industrial purposes, sulphur, sulphur dioxide, sulphite cooking liquor, lime and limestone, green and white liquor, salt cake, soda ash, size and alum fillers, glue and starch, and bleach.

The course will include two lecture hours each week through the semester in addition to two afternoons in the laboratory. Students in this course will use text in the original (Continued on Page 4)

A FABLE

TITLE: Professors and Grades.
SUGGESTED BY: Many students.
REFERENCE: An old fable.

THE FABLE: Once upon a time three learned professors were given four simple problems in addition, of which the correct answers were 70, 77, 85 and 93, respectively.

And it came to pass that the three learned professors failed to solve the problems, because, through force of habit, they found the sums to be 69, 76, 84 and 92, respectively.

CONCLUSION: Many professors at Lawrence would fail in the same four problems.

MORAL: 2000 years ago Aesop said, "He who is able to distinguish between a 69 and a 70; or a 76 and a 77 is indeed a 'distinguished' professor."

ON THE HOME STRETCH

With the opening of college in this second semester, members of the class of 1930 have made out their last schedule of classes. The race is more than three quarters over; the seniors have rounded the last turn, and are now on the home stretch.

The thought that college life is just about completed will create varying feelings among members of the class. Some will look back upon their three and one half years at Lawrence, wishing fervently that they had another three and one half years to go. Others are happy that this business of going to college is about to end. They are eager to enter into the world of business; they feel college has prepared them for just that—and now they are ready to be through with college. Probably there are a few who have no feelings whatever on the subject. They came to college; they have nearly completed four years; now they "expect to go into business," although they have "nothing definite in mind," and would really "just as soon stick around for a year or so."

But regardless of feelings, even a college graduate must support himself. The years to come will be years of self-planned evolution. No longer will methods of procedure be prescribed as definitely as class schedules were arranged. Responsibility will be of a different type, with consequences more unalterable.

However, no matter what they will meet on the long road that stretches down through the years, the seniors will find that life has been made happier and richer by their four years at Lawrence.

Nationwide Interest Centered On Institute Opening Here

An experiment in educational industrial circles, which is occupying nationwide attention was begun in Appleton this week with the opening of the Institute of Paper Chemistry at Lawrence college.

Indication of the interest which the Institute is arousing has been shown in several instances, one of the most important being that paper men point out that this is the first time a graduate school established in connection with an educational institution has received the support of the paper industries.

Letters received by the institute authorities commending the project are also evidences of the interest with which the opening of the institute is being regarded. In addition to letters of felicitation received from President Herbert Hoover and Dr. Julius Klein, assistant secretary of the department of commerce, received shortly after the organization was effected, more than 10 per cent of the paper mills and allied industries have written commending the Institute.

Requests asking if there are any graduates ready for employment in the mill laboratories is further indication both of the interest that the project is arousing and of the function it will perform in industry.

The Lawrence grapplers lost to the Green Bay Y.M.C.A. squad by a 21 1/2 to 14 1/2 score at Green Bay on January 21.

Clark Walton, '26, visited at the Beta Sigma Phi fraternity house on Sunday.

Knutzen Will Attend Ironwood Boys' Conference

Over the Horizon

HERE they come—the nucleus of an all-electric merchant marine. Yesterday, they were a dream. To-day, they are well over the horizon, linking the ports of the east and west coasts with fortnightly service. The goal of the Panama Pacific Line is to build three more turbine-electric ships, thus enabling weekly New York-Frisco sailings.

Even now, the three liners, *California*, *Virginia*, and *Pennsylvania*, constitute the largest fleet of turbine-electric commercial ships in the world.

Besides propelling these ships, electricity hoists freight, raises anchors, mans pumps, turns rudders, drives winches, and warps the vessels into their berths. It lights lamps, spins fans, operates elevators, cools and cooks food. Its magic touch is apparent on every deck.

All electric equipment, above and below deck, is a product of General Electric.

The planning, production, and distribution of such equipment has been largely the responsibility of college-trained men who are working with General Electric and who have aided in bringing these ships over the horizon.

Viking Mentor

A. C. Denney

Coach A. C. Denney, varsity basketball coach, will send his charges against the class of the Midwest League tomorrow night, when Carleton comes here. The Lawrence mentor has been faced with the task of reviving the listless team of last week's games into a hard driving team for tomorrow night's fracas.

Denney will put the Vikings through a light signal practice tonight as a final workout before the game.

Sport Spasms

Now that the din and the excitement have died away, it remains to get back to the serious business of basketball, swimming, track, wrestling, fraternity sports and such matters of importance. The exams have had their day and taken their toll. They're all over now, but the sports go on forever.

No sooner was Carroll gone and exams over, than up jumps Monmouth from nowhere in particular and away she goes. They must feed them something down there to make them so nervous. The only one on the whole team that stood still long enough to get a good look at was their center, and no one cared about looking at him anyway.

This forward called Morocco had a continual desire to run down the floor and throw the ball through the hoop and was childishly persistent about doing so, while the handsome guard was no slouch, even if he was overcome by modesty. That's all over too, however, and we won't meet them again so we might as well let that go.

And then came Cornell and one of those finishes. At least it was good to see a few people yell again, but if it takes a last minute win like that to do it, it would be better to have less yelling.

Well, that game is all over too, so we might as well be consistent and let that go as well. The Carleton game, however, has not been started, and there's no use letting that go until it is all over. They never fail to prove (Continued on Page 4)

Carleton, Beloit Lead Midwest Conference

VIKINGS HAVE WON TWO, LOST ONE LOOP TILT

Undeclared Carroll Five To Play Badgers Tomorrow; Ripon Improves

Midwest Standings

Beloit	2 0
Carleton	2 0
Monmouth	3 1
Knox	3 1
Lawrence	2 1
Ripon	2 3
Coe	1 2
Hamline	0 3
Cornell	0 4

Big Four Standings	
W	L
Carroll	2 0
Lawrence	1 1
Beloit	2 2
Ripon	0 2

While most of the schools were finishing semester exams, Monmouth moved up to the top rung of the Midwest ladder by defeating Lawrence 22 to 19, and then were dropped into second by Knox, Tuesday night. Beloit and Carleton are leading the league with two wins and no losses.

After losing their first Midwest contest, the Vikings put themselves back in the running when they took Cornell into camp 26 to 25. Cornell is the underdog of the league teams this year, Monmouth, Ripon, Coe, and Lawrence using the Iowa team as a "stepping stone."

The Ripon quintet is beginning to function with the result that the Redmen trimmed Cornell last week, 26 to 20 to give them their second Midwest victory. Potthoff's men hold a win over Coe.

Fans throughout the state will watch with interest for the result of the Carroll-University of Wisconsin game tomorrow night. The Pioneers are stepping out of their class to meet the Cardinals, but Waukesha followers are confident that Coach Kenney's men will make things interesting for Meanwell's squad.

Beloit dropped its second contest to Carroll 30 to 18. Coach Jagard also lost Louis Bottino, stellar guard, who was the big cog in the downstate offense. The Gold veteran went via the midsemester graduation route.

The last half of the pennant chasing will get under way this week end, with Monmouth playing host to Coe, Beloit meeting Cornell, and Knox taking on Coe.

Franklin McDonald, '28, now a student at the University of Wisconsin, is visiting fraternity brothers at the Beta Sigma Phi house.

Viking Cagers Break Even In Last Week's Midwest Games

The Viking quintet spent Friday and Saturday of last week in battle on the floor of the Alexander gymnasium, and came out of the tilts with one win and one defeat chalked up after its Midwest record. A small, fast-driving team, hailing from Monmouth, took Denney's charges over the rail by a 22-19 count on Friday, and on Saturday Cornell's aggregation bowed down to a close decision of 26-25 in favor of the Vikes.

From the start of the game, Monmouth's representatives took charge of affairs, presenting one of the fastest offensives ever seen in local cage circles. While Lawrence was still marvelling at the snappy attack of the invaders 15 points were tossed in by Morocco and his teammates. The Viking score stood at seven at the end of the first half.

With the start of the final period, prospects looked rosier as Rasmussen found the hoop and the Monmouth lads found it harder to lose the men who were guarding them. Fischl was put on Morocco and held the flashy little forward down considerably from his destructive scoring performance of the first half. With the entire team clicking more as a unit, the score was brought to 22-19 as the game ended and Monmouth had stepped into uncontested first place in the Midwest loop.

It was again a lifeless crew that wore the Blue and White out on the floor to assume hostilities against Cornell on Saturday and for the entire first half there was a spiritless exhibition of basketball with Cornell stubbornly keeping her score close to or a little ahead of the Lawrence total. It again remained for a last half rally to turn the tide of victory, and this time the final effort was successful.

Vanderblumen, the sophomore who has been on the reserve forward list all season, was given his first big chance to come through and made up in fight what he lacked in knowledge and experience.

Gift shots, which had been freely missed by the Vikes throughout the game, were an important factor in the ultimate victory, Vanderblumen coming through with four of these and the Cornell lads obligingly failing to locate the hoop with their free chances when they really needed them. The

single point lead was garnered with only a couple of minutes to go, and in spite of frenzied efforts on the part of the invaders, the Vikings managed to retain the ball until the final whistle ended the fracas.

Lawrence Will Not Play Host To Valley Tracksters

The Lawrence college athletic department will no longer be host to the annual spring high school track meet, it was announced today. The action was taken in view of the greater emphasis Lawrence is placing upon varsity track and the necessity of a spring schedule which conflicts with the high school meet.

Lawrence Bluefins To Meet Columbus Tonight

The Viking swimming team will be hosts to the undefeated Columbus club tankmen tonight at the new Alexander gymnasium pool in an attempt to continue their winning streak begun January 21, when a 26-24 victory was taken from the Green Bay "Y". In a previous meet, with the "Y" team, Lawrence came away with a one point defeat.

The Lawrence mermen, strengthened by the addition of Cinkosky and Ryan, were put out in front through Schier's work in the diving and relay events. Cinkosky lost the diving event for the first time since he has entered Lawrence varsity competition. Three "Y" records were tied when Saunders of Green Bay equalled the century and the 40 yard dash records, and Kellogg tied the 40 yard breast stroke record.

Twenty Frosh Answer Track Practice Call

Frosh track men who have had previous experience in high school were called out for training Wednesday afternoon. About 20 men answered the call. This squad will work out together with the varsity men.

A track meet will be held this afternoon with the entire squad competing. An attempt will be made to lower the records hung up three weeks ago in the initial squad meet.

Notice

Men students who are interested in taking the Red Cross life saving tests should notify Harold Sperka, swimming instructor, before next Wednesday.

Dr. Wriston Talks On Carnegie Report

Defends College Students In Address Before Washington Church Meet

President H. M. Wriston on his recent trip to the east defended college students from the accusations of the Carnegie report on athletics in a speech made to the Educational association of the Methodist Episcopal church in Washington, January 18.

"Those of us who are too prone to criticize students should remember that college faculties have generally raised their activities with some very bad results," Dr. Wriston remarked. "Perhaps the most conspicuous instance of this character is the control of athletics."

"Athletics were started as a student activity, from student interest. They were an activity as, of, by and for the students. By steps scarcely perceptible at the time, and only now in the perspective of history becoming clear, control of athletics shifted from the students to the faculty, and put management of the enterprise into the hands of the administration. membered, is very largely an indictment. The Carnegie report, it must be remnant of athletics under faculty control, for that is the principle upon which most of the institutions whose practices are so sharply criticized are operating."

Dr. Wriston attended Lawrence alumni meetings in Washington, Boston, and New York, giving an account of the developments on the campus at each gathering.

Howard Aderhold, ex-'27, visited at the Beta house yesterday.

STUDENTS MUST GO TO RECITALS

Compulsory Attendance For Conservatory Students Is Established

A new system of compulsory recital attendance has been established at the beginning of this semester, at the conservatory. Previously, there has been no regulation of attendance at recitals, but under the new ruling every full course conservatory student must attend at least 15 of the student recitals which will be given during the remainder of the year. In addition, attendance is required at all faculty recitals.

The regular class cut system will be employed as a penalty for non-attendance at all 15 recitals. For every missed recital, a half of a grade point will be deducted. In case a student attends more than the allotted 15, he will receive an additional grade point for each extra recital.

Attendance will be checked at the door before the recital. In no case will a student be permitted to leave before the end of the program.

Eddie Koch Catches Glimpse Of Royalty

(Continued from Page 1)

Allee and a magnificent arch, at the other the imposing University of Berlin, while down the middle is a boulevard lined with trees on both sides and which, when everything is green in the springtime, must be very beautiful. Everywhere the people seem happy, cheerful, and friendly.

On the outskirts of the city, especially on the west, one finds huge forests which are very much like parks, they are so well kept. Throughout are little lakes which provide excellent bathing facilities in summer, and skating rinks in winter.

It was indirectly through Mr. Hoffmann that I was able to locate the Stumpe family, with whom I am living. Frau Geheimrat Stumpe is a very kind widow possessing two wonderful virtues—the ability to cook and the fear I won't get enough to eat. Aside from the time I asked her to call me up on the telephone the next morning at eight o'clock, instead of asking to wake me up, we get along very well in German. Then there are the immense feather-beds in which one seems to float away; unique earthenware; brick stoves to heat the rooms; large and small—but, I must get this letter posted or it will be late like my Christmas letter.

Sincerely yours,
EDGAR R. KOCH.

Open Paper Institute; Seven Are Enrolled

Darling, Rogers on Faculty

The Chemistry of Cellulose and Allied Products, is being taught by Dr. Stephen Darling, associate professor of chemistry at Lawrence College. Dr. Darling received his Ph.D. from Harvard and came to Lawrence following a year of study in Austria. One Laboratory period each week together with lectures will introduce Institute students to this all important phase of the paper industry.

Professor W. E. Rogers, of the Botany department at Lawrence college will deliver a lecture course on the "Structure and Physical Properties of Wood and Plants." This course will deal with the source, structure, and important properties of the raw fibrous materials used in pulp making. Wood identification from a practical standpoint and suitability of the various woods for pulp purposes will be included.

Four courses dealing with the specialized fields of paper chemistry will be taught by Dr. Otto Kress, nationally known for his experience, training and engineering ability in pulp and paper chemistry. In these courses, Dr. Kress brings to the Institute a valuable contribution to the paper makers enrolled at the graduate school. "Microscopy of Paper Fibres" dealing with the staining and identification of the various fibres used in paper making, and the analysis of fibre content of different kinds of paper will be explained and demonstrated in this lecture course.

Paper Dyeing concerns itself with the dyestuffs and pigments classified according to the method used in the industry, and is to be discussed from the standpoint of suitability, strength, fastness, etc. One lecture and two laboratory periods each week will be devoted to this course.

Paper Testing and Pulping Processes are both lecture courses. The latter will deal with the mechanical sulphite, soda and sulphate processes, as well as the newer processes, such as the semi-chemical and Kebra Processes. Visits will be made to mills adjacent to Appleton, where these

D. I. Keglers Still Lead Interfraternity League

Four interfraternity bowling matches were run off during the examination period with the following results: The Psi Chis won two out of three from the Delta Sigs; the Phi Taus took three straight from the Theta Phis; the D.I.'s made a clean sweep of the Beta games; and the Phi Taus won two and lost one in their match with the Sig Eps.

The D.I.'s are now in undisputed first place with eight wins and one defeat, while the Phi Taus hold second.

processes can be seen and studied in operation.

A course in technical German will be taught by Dr. G. C. Cast, professor of German at Lawrence College.

One of the features of the Institute course will be lectures delivered by experts from the mills in Wisconsin.

The Institute of Paper Chemistry represents a million dollar endowment project financed by 90% of the paper mills of Wisconsin. It begins with an annual operating budget of \$60,000.

Director of the Institute is Henry M. Wriston, president of Lawrence College. Officers of the Institute board include: president, Ernest Mahler, Neenah; vice president, D. Clark Everest, Rothschild; secretary, Henry M. Wriston, Appleton; executive secretary, Westbrook Steele, Appleton; treasurer, R. J. Watts, Appleton. Trustees in addition to officers include Hugh Strange, Neenah; M. A. Wertheimer, Kaukauna; Dan K. Brown, Neenah; and L. M. Alexander, Port Edwards.

duce a real outfit and their game with Lawrence never fails to be a dinger, so come around and have a look. It's all included in the money you just coughed up not long ago, and you might just as well get all you paid for.

Well, if this is made any longer it will have to be continued in the next issue which hardly seems fair to the next issue. It might turn out to be a good one, and there's no use of cramping it before it even gets started. See you at the game.

"Vint"

Notice

The interfraternity basketball games scheduled for January 25 will be played tomorrow and the entire schedule shoved ahead accordingly. All games from now until the end of the season will be played at 1:30, 2:30, and 3:30 o'clock on Saturday afternoons.
